

## Springtime Scavenger Zoo-Venture

The grizzly bears woke up which means, it's SPRING!

Go on a walk with an adult to see if you can find evidence of springtime.

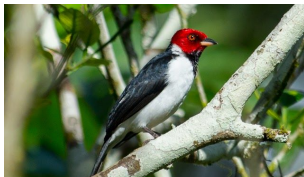

1. Ornate box turtles, like Thelma and Louise, will be coming out of hibernation and digging out of their burrows. Can you find evidence of an animal who's been digging?

2. Birds, including sandhill cranes like Buckbeak, are migrating north for the springtime! While you are on your walk count how many birds you see!

3. Frogs, like Tinkerbell the African bullfrog, are starting to call! As the sun is setting go out by the nearest body of water and listen for frog calls.

4. Birds, like the red capped cardinal in our aviary, are starting to build nests. Can you find some materials outside that you think would build a great bird's nest?

5. Things are getting greener and greener! Animals, like Flora and Fauna the North American porcupines, love to eat the shoots of plants as they begin to grow. Can you find any budding leaves coming up from the ground?

6. Our bears, Nuniq, Berrit, Ash and Lexi all love to get a little muddy. Can you find some mud outside? When you find some take a closer look to see if there's any evidence of animals or people moving through it.
